James A. Graham, *Commissioner*

The 1987 Edition of the North Carolina Pesticide Report represents a revision of previous issues. By elaborating on the purpose of this report, by adding new material, and by better defining the substances listed, we attempted to reflect in a more meaningful manner the information collected during the 1987 calendar year. We hope that more readers will be able to use it more effectively and be able to understand how its use can facilitate the pesticide industry from manufacturer to consumer.

This will also acknowledge and express our appreciation to the following people who made significant contributions to the contents and preparation of this Pesticide Report: *Pesticide Section* - Jean G. How to Use This Report

Considerable time and effort has gone into editing and organizing this 1987 edition of the Pesticide Report. Every section has been updated, new information added as necessary, and details expanded to make this Report a more complete and up-to-date reference as to the sale and use of pesticides in North Carolina.

In this Pesticide Report you will find:

Introduction

The Introduction accurately reflects the development of laws and regulations governing the sale and use of pesticides in North Carolina.

It also refers to certain divisions in the North Carolina Department of Agriculture that perform key roles in regulating and controlling the sale and use of pesticides in this State.

Brief of the North Carolina Pesticide Law of 1971

Pesticides Examined, 1987

This section presents in table form an alphabetical listing of the manufacturer of the pesticides that were sampled and analyzed in the Department's laboratories in 1987. Results of the analyses are tabulated and total numbers of each determination made are at the end of the table.

Samples at Variance From Guarantee, 1987

This table lists the samples found by the Department's laboratories to be at variance from guarantee in 1987. The table also lists the name of each manufacturer, each pesticide brand name, and presents data and a description indicating how each sample examined varied from guarantee.

Other Violations, 1987

This section gives the names of firms that manufactured or distributed products in North Carolina and had one or more violations under the North Carolina Pesticide Law of 1971. These violations constituted either unregistered or misbranded products examined at pesticide outlets but not sampled for analysis.

Summary of Regulatory Activities Performed Under the North Carolina Pesticide Law, 1987

This section presents a summary of the total numbers of manufacturers who registered pesticides in North Carolina; pesticide formulations registered; pesticides examined; stop-sale, stop-use, or removal orders issued; licenses issued; and equipment inspections.

Introduction

Pesticides cover a large number of materials and mixtures intended for destroying, controlling, or repelling pests such as insects, weeds, and other noxious plants, predatory animals and birds, soil-infesting pests such as nematodes, algae, snails, and bacteria. Other examples are disinfectants, antiseptics, and fungicides for use other than on living man or other animals, defoliants, various repellents, fly paper, and other adhesive products whose action goes beyond simple mechanics, moth proofers, wood preservatives other than common paints, mildew controls, and seed fumigants.

An adequate and readily available supply of many of these products is essential in the economical production of feed and fiber crops. The preservation of many products in storage and the control of domestic and industrial pests which affect both the health and welfare of human beings and animals are likewise dependent on such materials.

While the development and distribution of various pesticides to serve the needs are important, provisions must be present to protect the public. During the years 1947 through 1971, it was the purpose of the economic poisons law (North Carolina Insecticide, Fungicide, and Rodenticide Act of 1947, G.S. 4A, Chapter 106) to protect the public from adulterated, misbranded, worthless, and dangerous products, and legitimate manufacturers from unscrupulous competition.

During the years 1953 through 1971, the aerial application of pesticides was regulated by the North Carolina Aerial Crop Dusting Law, G.S. 4B, Chapter 106. The Law and the regulations promulgated thereunder, in summary, required the registration and licensing of contractors and aviators who engaged in the custom application of pesticides by aircraft in North Carolina. The validity of a license was further restricted to the period of time that coverage by liability bond or insurance for damage by aircraft was in force.

During 1969, the North Carolina General Assembly through House Resolution 1392 directed the Legislative Research Commission to study the laws regulating pesticides in N. C. and report its findings and recommendations to the 1971 General Assembly. As a result of the findings and recommendations of the Commission, the North Carolina Pesticide Law of 1971 was adopted.

The N. C. Pesticide Law of 1971 established the North Carolina Pesticide Board as the governing body for the programs of pesticide management and control set forth in the Law. Provisions for regulating the use, application (aerial and ground), sale, storage, disposal and registration of pesticides are set forth in the Law.

The Law provides for the adoption of a list of restricted use pesticides and requires the licensing of all pesticide dealers who sell restricted use pesticides directly to users. Pesticide applicators and consultants are also subject to licensing requirements.

The Commissioner of Agriculture is responsible for administering and enforcing the Law and all rules and regulations adopted by the Board.

Each brand or grade of pesticide must be registered with the North Carolina Department of Agriculture before it can be legally offered for sale in the State. A \$25.00 registration fee for each brand or grade must accompany each Application for Registration.

As under the economic poison law, a state-wide inspection service will be maintained for the collection of official samples of pesticides from dealers. Individual requests for inspections are also made. As authorized, additional pesticide samples will be taken at the user level as they are being applied to determine if they are being used in an approved manner. Samples of the commodity to which pesticides have been applied will also be taken when deemed appropriate.

Samples are sent to the Department's laboratories for analysis. Reports of analytical results are forwarded to manufacturers, dealers, and users. As a further means of reporting, the Pesticide Report covering a year's work as exemplified herewith, is published annually.

Brief of the North Carolina Pesticide Law of 1971

North Carolina Pesticide Board

Governing Body

Commissioner of Agriculture, Raleigh, N.C.

Administrative
and Enforcement
Authority

North Carolina Pesticide Advisory Committee

Assists the Board and
Commissioner in an
advisory capacity

Any pesticide may be designated as a "restricted use pesticide" upon the grounds that in the judgment of the Board it is so hazardous or injurious to persons, pollinating insects, animals, crops, wildlife, lands, or the environment that additional restrictions on its sale, purpose, use, or possession are required. Restricted Use Pesticides include any pesticide required by the Environmental Protection Agency to bear the designation on its labeling "Restricted Use Pesticide." (Restricted Use Pesticides have been established by regulation.)

Restricted Use
Pesticides

The Board may require certification and recertification of private pesticide applicators and charge a fee of up to \$10.00. The current fee is established by regulation at \$6.

Private Applicator
Certification
Requirement

All pesticide dealers who sell restricted use pesticides must be licensed. Application for a pesticide dealer's license must be accompanied by a nonrefundable fee of \$25. All licenses shall expire on December 31 of the year for which they are issued. The license may be renewed annually upon application to the Department of Agriculture, accompanied by a non-refundable fee of \$25 for each license, on or before the first day of January of the calendar year for which the license is issued. Each applicant must demonstrate upon written, or written and oral, examination his knowledge of pesticides, their usefulness and their hazards; his competence as a pesticide dealer; and his knowledge of the laws and regulations governing the use and sale of pesticides.

Pesticide Dealer
Licensing Requirement

No person shall engage in the business of pesticide applicator within North Carolina unless he is licensed annually by the Board. Each license application shall be accompanied by a nonrefundable fee of \$25 for each applicator's license and an additional \$10 for each aircraft to be licensed. A pesticide applicator is defined as any person who owns or manages a pesticide application business which is engaged in the business of applying pesticides upon the lands or properties of another; any public operator; any golf course operator; any seed treater; any person engaged in demonstration or research pest control; and any other person who acts as a pesticide applicator and is not exempt from this definition. It does not include:

Pesticide Applicator
Licensing Requirement

- a. Any person who uses or supervises the use of a pesticide (i) only for the purpose of producing an agricultural commodity on property owned or rented by him or his employer, or (ii) only (if applied without compensation other than trading of personal services between producers of agricultural commodities) on the property of another person, or (iii) only for the purposes set forth in (i) and (ii) above.

- b. Any person regulated by the North Carolina Structural Pest Control Law (G.S. Chapter 106, Article 4C.)

Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide applicator or public operator. In addition, to be licensed as a pilot, a person must have 125 hours and one year's flying experience as a pilot in the field of aerial pesticide application.

No person shall perform services as a pest control consultant without first procuring from the Board a license. The application for a license shall be accompanied by an annual nonrefundable fee of \$25. A pest control consultant is defined as any person who, for a fee, offers or supplies technical advice, supervision, or aid, or recommends the use of specific pesticides for the purpose of controlling insects, plant diseases, weeds, and other pests, but does not include any person regulated by the North Carolina Structural Pest Control Act. Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide consultant. However, the North Carolina Pesticide Board may waive the requirement for taking parts of the North Carolina consultant examination provided the applicant has a Ph.D., master's, or bachelor's degree in the discipline pertinent to the category for which a license is desired and provided the applicant has demonstrated successful completion of pertinent academic training or has passed a written or oral examination offered by another state or a professional organization. Applicants will be required to successfully complete written, or written and oral, examination(s) which demonstrates adequate knowledge of pertinent subject matter not specifically completed in academic training including knowledge of applicator state and federal pesticide laws and related subject matter.

Pest Control
Consultant
Licensing Requirement

No person shall handle, transport, store, display, or distribute pesticides in such a manner as to endanger man or his environment.

Handling, Storage, and
Disposal of Pesticides

Every pesticide prior to being distributed, sold, or offered for sale within this State or delivered for transportation or transported in intrastate commerce or between points within this State through any point outside this State shall be registered and such registration shall be renewed annually. Each manufacturer, distributor, or registrant of a pesticide shall supervise the activities of any employee or agent to prevent the making of deceptive or misleading statements about a pesticide. It shall be unlawful for any person to distribute, sell, or offer for sale any restricted use pesticide to any dealer who does not hold a valid N.C. Pesticide Dealer License.

Registration

A registration fee of \$25 for each brand or grade of pesticide is required. An additional \$100 delinquent registration penalty shall be assessed against the registrant for each brand or grade of pesticide marketed in North Carolina prior to registration.

Registration Fee and
Delinquent Penalty

Registration is subject to refusal or cancellation for cause and upon hearing.

Refusal or
Cancellation of
Registration

Any brand or grade found to be deficient or excessive in active ingredients, misbranded, adulterated, or not registered is subject to "Stop Sale, Stop Use Orders."

Deficiencies
"Stop Sale, Stop
Use Orders"

The Pesticide Board may assess a civil penalty of not more than \$2,000 against any person who violates certain specifically enumerated provisions of this Law. In determining the amount of any penalty, the Board may consider the degree and extent of harm caused by the violation and the cost of rectifying the damage caused by the violation.

Civil
Penalties

Notwithstanding any other provision of this Law, the maximum penalty which may be assessed under this section against a "private pesticide applicator" is \$500 and such penalties may be assessed only for willful violations.

Any person who shall be adjudged to have violated any provision of the Law, or any regulation of the Board adopted pursuant to this Law, shall be guilty of a misdemeanor and for each violation shall be liable for a penalty of not less than \$100 or more than \$1,000 or shall be imprisoned for not more than 60 days, or both. In addition, if any person continues to violate or further violates any provision of this Article after written notice from the Board, the court may determine that each day during which the violation continued or is repeated constitutes a separate violation subject to the foregoing penalties.

Other
Penalties

NOTE: Copies of the North Carolina Pesticide Law of 1971, as amended through 1987, and additional copies of the regulations adopted by the North Carolina Pesticide Board may be obtained upon request to the Pesticide Section, North Carolina Department of Agriculture, P.O. Box 27647, Raleigh, North Carolina 27611.

SECTION .0400 - SAMPLES AND SUBMISSIONS

.0401 SAMPLES: SUBMISSIONS

(a) Personnel of the food and drug protection division are authorized and directed to sample, test, inspect, and make analysis of pesticides sold, offered for sale, distributed, or being applied within this state, at the time and place and to such an extent as is deemed necessary to determine whether such pesticides are in compliance with the provisions of the North Carolina Pesticide Law of 1971.

(b) An official analysis is made from the official sample. An official check sample is kept until an analysis has been made of the official sample. If the official sample analysis does not pass analysis, an official check sample is retained for 90 days in order to allow the registrant to obtain a portion of it for his own analysis, if he so chooses. Requests for portions should be made in writing to the Food and Drug Protection Division, North Carolina Department of Agriculture, Raleigh, North Carolina, 27611.

History Note: Statutory Authority G.S. 143-446;

Eff. February 1, 1976;

Amended Eff. August 1, 1982; January 27, 1978.

.0402 TOLERANCES

In regards to establishing tolerances providing for reasonable deviations from the guaranteed analysis statement, the following guidelines are adopted:

- (1) that, in general, a "passed" judgment on a pesticide formulation be made if the analytical results are within the following guidelines:

Pesticide Active Ingredient Guarantee, Percent	Allowable Deviation Below Guarantee
1.00	15 percent of Guarantee
1.00 - 19.99	0.1 plus 5 percent of Guarantee
20.00 - 49.99	0.5 plus 3 percent of Guarantee
50.00 - 100.00	1.0 plus 2 percent of Guarantee

Additional considerations:

- (a) If a sufficient number of samples as determined by the food and drug protection division of a given product indicate that the manufacturer is not formulating the product to achieve the level of the guarantee, an administrative judgment may be made to warn the formulator against the practice of formulating products in a manner only to stay within the allowable deviation from the guarantee.
- (b) A sample result falling outside of the guidelines may not necessarily be "deficient" if one of the following factors could reasonably be expected to have contributed significantly to the off-limits analysis:
- special sampling problems, such as fertilizer-pesticide mixtures and certain granular products;
 - accuracy, specificity, reproducibility, etc., of the methods used when applied to the particular formulation;
- (2) that, allowable deviations, similar to those for "deficiencies," are not applicable to "overages." Each sample analysis will be judged individually as to whether or not the overage is excessive by using the following criteria:
- no illegal residues resulting from use according to directions;
 - no significant additional hazard to applicator or user;
 - no significant damage to non-target organisms or the environment;
 - stability of ingredients and the need for "over-formulating";
 - accuracy, specificity, reproducibility, etc., of the methods used when applied to the particular formulation.

History Note: Statutory Authority G.S. 143-446;

Eff. February 1, 1976;

Amended Eff. August 1, 1982; January 27, 1978.

.0403 PESTICIDE SAMPLING PROCEDURES

- (a) Procedures for sampling pesticides vary in accordance with the type of pesticide to be sampled and the type of sample to be taken.
- (b) Pesticide samples are classified according to the following categories and procedures:
- (1) "Formulation samples" must be taken from the manufacturer's original unopened container using clean sampling equipment so as to avoid any contamination. Judgments are based on tolerances for reasonable deviations from the guaranteed analysis statement.
 - (2) "Pesticide use samples" are obtained by division personnel who may sample pesticides from the consumer as it is being applied or during preparation for application. Judgments are made depending on the directions for use contained on the registered pesticide label.
 - (3) "Pesticide commodity samples" are obtained by division personnel who are authorized to sample commodities and submit them for analysis in order to determine whether properly registered pesticides have been applied according to label directions.
 - (4) "Pesticide incident samples" are obtained by division personnel who are authorized to take samples, inspect, and investigate any incidents in which pesticides are reported or thought to be involved.

SECTION .0600 - PESTICIDE AND PESTICIDE CONTAINER DISPOSAL

.0601 DEFINITIONS

The following definitions will be in effect throughout 2 NCAC 9L .0600:

- (1) "Complete destruction" of pesticides means alteration by physical or chemical processes to inorganic forms.
- (2) "Container" means any package, can, bottle, bag, barrel, drum, tank, or other containing device (excluding spray applicator tanks) used to enclose a pesticide or pesticide-related wastes.
- (3) "Excess pesticides" means all pesticides which cannot be legally sold or which are to be discarded.
- (4) "Inorganic pesticides" means noncarbon-containing substances used as pesticides.
- (5) "Heavy metals" means metallic elements of higher atomic weights, including but not limited to arsenic, cadmium, copper, lead, mercury, manganese, zinc, chromium, tin, thallium, and selenium.
- (6) "Metallo-organic pesticides" means a class of organic pesticides containing one or more metal or metalloid atoms in the structure.
- (7) "Organic pesticides" means carbon-containing substances used as pesticides, excluding metallo-organic compounds.
- (8) "Pesticide incinerator" means any installation capable of the controlled combustion of pesticides, at a temperature of 1000 degrees Centigrade (1832 degrees Fahrenheit) for two seconds dwell time in the combustion zone, or lower temperatures and related dwell times that will assure complete conversion of the specific pesticide to inorganic gases and solid ash residues.
- (9) "Pesticide-related wastes" means all pesticide-containing wastes or by-products which are produced in the manufacturing or processing of a pesticide and which are to be discarded, but which, pursuant to acceptable pesticide manufacturing or processing operations, are not ordinarily a part of or contained within an industrial waste stream discharged into a sewer or the waters of the state.
- (10) "Safe disposal" means discarding pesticides or containers in a permanent manner so as to comply with these procedures and so as to avoid unreasonable adverse effects on the environment.
- (11) "Sanitary landfill" means an approved disposal facility employing an engineered method of disposing of solid wastes on land in a manner which minimizes environmental hazards by spreading the solid wastes in thin layers, compacting the solid wastes to the smallest practical volume and applying cover material at the end of each working day.
- (12) "Specially designated landfill" means a landfill at which complete protection is provided for the quality of surface and subsurface waters from pesticides, pesticide containers and pesticide-related wastes deposited therein, and against hazard to public health and the environment. Such sites should be located and engineered to avoid direct hydraulic continuity with surface and subsurface waters, and any leachate or subsurface flow into the disposal area should be contained within the site unless treatment is provided. Monitoring wells should be established and a sampling and analysis program conducted. The location of the disposal site should be permanently recorded in the appropriate office of legal jurisdiction.

*History Note: Statutory Authority G.S. 143-441;
Eff. February 1, 1976.*

.0602 DISPOSAL OF PESTICIDES

(a) In considering disposal techniques, first preference shall be given to procedures designed to recover some useful value from excess pesticides and containers. Where large quantities are involved, the excess material should be used for the purpose originally intended, provided this use is legal.

(b) Organic pesticides which do not contain mercury, lead, cadmium, or arsenic may be disposed of by incineration at temperatures which will ensure complete destruction.

(c) Incineration is not applicable to those pesticides which contain heavy metals such as mercury, lead, cadmium, or arsenic, nor is it applicable to those organic pesticides or other metallo-organic pesticides which have not been treated to remove the heavy metals.

(d) If incineration is not applicable or available, disposal in specially designated landfills is an alternative.

(e) All disposals of excess pesticides and pesticide-related wastes shall be instituted under approval and supervision of a pesticide disposal committee of the North Carolina Pesticide Board. This committee shall receive application for the desired disposal task, review each problem based on its individual circumstances and complexity, and submit a recommended solution plan to the disposal applicant.

Eff. February 1, 1976.*

.0603 DISPOSAL OF PESTICIDE CONTAINERS

- (a) Pesticide containers shall be disposed of in accordance with these regulations within 30 days after they have been emptied or termination of their useful value to the owner.
- (b) Pesticide containers shall be disposed of by either of the following methods:
- (1) incineration in a pesticide incinerator; however, no container which formerly contained mercury, lead, cadmium or arsenic compounds shall be incinerated; or
 - (2) burial in an approved sanitary landfill.
- (c) All containers designed to contain liquids shall be thoroughly rinsed and drained prior to disposition into disposal collection systems of approved landfill operations.

*History Note: Statutory Authority G.S. 143-441;
Eff. February 1, 1976.*

.0604 PROHIBITED DISPOSAL PROCEDURES

- (1) in a manner inconsistent with these regulations;
- (2) so as to cause or allow open dumping of pesticides or pesticide containers;
- (3) so as to cause or allow open burning of pesticides or pesticide containers; except, the open burning by the user of small quantities of combustible containers formerly containing organic or metallo-organic pesticides; however, under no condition shall compounds containing mercury, lead, cadmium, or arsenic be burned;
- (4) so as to cause or allow water dumping, or ocean dumping;
- (5) so as to violate any applicable federal or state pollution control standard; or
- (6) so as to violate any applicable provisions of the North Carolina Pesticide Law.

The contractor shall be responsible for the compliance of the business with the North Carolina Pesticide Law of 1971 and all regulations promulgated thereunder except where the responsibility is specifically designated to another person(s) by these Rules.

(c) All agricultural aircraft operations (pilot or contractor) shall keep a written record to be completed within 72 hours (see number 12 in this Paragraph for exception) after each application. This requirement must be fulfilled sooner if requested by an employee of the Pesticide Section for the purposes of a pesticide incident investigation. The record shall show the following:

- (1) name of contractor;
 - (2) name and address of the person for whom the pesticide was applied;
 - (3) identification of farm or land sites treated with pesticide(s);
 - (4) name of crop which was treated;
 - (5) total number of acres treated;
 - (6) the year, month, day, and approximate time the pesticide was applied;
 - (7) the brand name of the pesticide(s) and EPA registration number;
 - (8) amount of formulated product or active material applied per acre (must specify);

Rinsing shall be conducted in an area where an environmental hazard will not be created by the drainage or disposal of waste materials and conducted with methods which will not create an environmental or human hazard.
- (f) During application, the flow and mixture of the pesticide(s) shall be uniform. Pilots and contractors shall utilize equipment which will maintain a uniform mixture and flow during application.
- (g) Pilots and contractors shall use and operate, in any agricultural aircraft operation, aircraft equipped with spray or spreading equipment suited, according to its manufacturer's recommendations for the pesticide(s) to be applied. All aerial spray or spreading equipment shall be free of leaks and shall have a positive shutoff system to prevent leaking and dissemination of pesticides on any nontarget areas over which the flight is made. Such equipment shall not allow spillage, dripping and backflow or create a hazard from vapors or drift.
- (h) The loading area shall be kept reasonably free of pesticide contamination.
- (i) No pesticide(s) shall be applied by an aerial applicator while any persons other than those assisting in the application are in the target area.

.1907 PURPOSE AND IMPLEMENTATION OF CONTINGENCY PLAN

(a) The person responsible for each large commercial storage facility shall have an approved contingency plan for the facility. The contingency plan shall be designed to minimize hazards to human health or the environment from fires, explosions, spills, or any other unplanned sudden or non-sudden release of pesticides or pesticide contaminated materials to air, soil, or surface water.

.1908 CONTENT OF CONTINGENCY PLAN

(a) The contingency plan shall describe the actions facility personnel shall take to respond to fires, explosions, spills, or any other sudden or non-sudden release of pesticides or pesticide contaminated materials to air, soil, or surface water at the facility.

(b) Where appropriate, the plan shall describe arrangements agreed to by local police departments, fire departments, hospitals, contractors, and state and local emergency response teams to coordinate emergency services.

(c) The plan shall list names, addresses, and phone numbers (office and home) of all persons qualified to act as alternates who can be reached at any time of the day, seven days a week, and who are thoroughly knowledgeable of the facility, including operational and emergency procedures. Where more than one person is listed, one shall be named as primary alternate, and others shall be listed in the order in which they will assume responsibility as alternates.

.1910 REVIEW AND RETURN OF CONTINGENCY PLAN

(a) If the contingency plan is submitted in insufficient detail so that the board, through its review of the plan, cannot make a determination as to the adequacy of the plan, the FORM PC-417 shall be returned to the large commercial storage facility with a designation of areas that need further detail or clarification.

(b) A person shall resubmit FORM PC-417 in sufficient detail within 60 days after receipt of notification by the board that additional detail or clarification is required in the form.

.1911 AMENDMENT OF CONTINGENCY PLAN

The contingency plan shall be reviewed and immediately amended and resubmitted to the board, if necessary, whenever:

- (1) the plan fails in an emergency;
- (2) the facility changes -- in its design, construction, operation, maintenance, or other circumstances -- in a way that materially increases the potential for fires, explosions, or releases of pesticides or pesticide contaminated materials, or changes the response necessary in an emergency;
- (3) the list of alternate changes; or

SECTION .2000 - CHEMIGATION

.2001 DEFINITIONS

All specific words or terms used in this Section shall have the same definitions as shown in the North Carolina Pesticide Law of 1971, G.S. 143-460, or unless the context otherwise requires, other definitions shall be:

- (1) **Antisiphon Device.** Any equipment that prevents the backflow of a pesticide into any water supply or the backflow of water into a pesticide supply. Antisiphon devices include automatic low pressure drain, check valve, flow interrupter, and vacuum relief valve.
- (2) **Automatic Low Pressure Drain.** A self-activating device to drain that portion of an irrigation pipeline whose contents could potentially enter the water supply when operation of the irrigation system pumping plant fails or is shut down.
- (3) **Check Valve.** A device to provide a positive closure of an irrigation pipeline or pesticide injection line that effectively prohibits the flow of pesticide or water in the opposite direction of that desired when operation of the irrigation system pumping plant or pesticide injection unit fails or is shut down.
- (4) **Chemigation.** Any process whereby pesticides are applied to land, crops, and/or plants utilizing an irrigation system. Some examples are agricultural, nursery, turf, lawn, golf course, and greenhouse sites.
- (5) **Chemigation and/or Irrigation Water Supplies.** Any source of water that is used for chemigation and/or irrigation to include private wells, public water systems, ground or surface water sources.
- (6) **Flow Interrupter.** A device that provides positive interruption or cessation of pesticide or water flow in either direction upon pesticide injection unit shutdown or failure.
- (7) **Functional Systems Interlock.** A system used to link irrigation pumps and pesticide injection units, other pumps or supply tanks so designed that in the event of irrigation pump malfunction or failure, shutdown of the pesticide injection units will occur.
- (8) **Inspection Port.** A place on the irrigation pipeline that can be utilized to determine visually if the check valve leaks.
- (9) **Irrigation.** The act of mechanically supplying water to land, crops and/or plants.
- (10) **Irrigation System.** Any device or combination of devices having hose, pipe or other conduit which connects directly to any water supply. The term does not include any handheld hose-end sprayer which is constructed so that an interruption in water flow automatically prevents any backflow to the water supply.
- (11) **Public Water System**
 - (a) a system for the provision to the public of piped water for human consumption if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year. Such term includes:
 - (i) any collection, treatment, storage, and distribution facility under control of the operator of such system and used primarily in connection with such system; and
 - (ii) any collection or pre-treatment storage facility not under such control which is used primarily in connection with such system.
 - (b) It is either a "community water system" or a "non-community water system":
 - (i) **Community Water System.** A public water system which serves at least 15 service connections or regularly serves at least 25 year-round residents.
 - (ii) **Non-Community Water System.** A public water system which is not a community water system.
- (12) **Vacuum Relief Valve.** A device to automatically relieve or break vacuum in an irrigation pipeline.

*History Note: Statutory Authority G.S. 143-463; 143-466;
Eff. January 1, 1987.*

.2002 APPLICATION OF PESTICIDES THROUGH IRRIGATION SYSTEMS

(a) These systems shall be fitted with effective antisiphon devices and a functional systems interlock that will prevent the backflow of pesticide or pesticide-water mixtures into water supplies or the backflow of water or pesticide-water mixtures into pesticide supplies during times of irrigation system failure

or equipment shutdown. If a public water system is being utilized as the water source, the chemigation system shall not be connected directly to it. See requirements in Rule .2003 of this Section.

(b) Pesticides shall not be injected into an irrigation system on the suction side of the irrigation pump.

(c) Such safety devices or valves shall be installed between:

- (1) the irrigation system pump discharge and the point of pesticide injection into the irrigation system, and
- (2) the point of pesticide injection into the irrigation system and the pesticide tank or container in accordance with Rule .2002(d).

(d) Such systems shall effectively meet the following criteria:

- (1) double check valves shall be located between the irrigation pump discharge and the point of pesticide injection into the irrigation pipeline. These valves, when installed, shall be on a horizontal plane and level. A deviation of not more than 10 degrees from the horizontal shall be set.
- (2) an inspection port shall be located between the irrigation pump discharge and the mainline check valves. In many cases, the vacuum relief valve connection can serve as the inspection port.
- (3) a vacuum relief valve shall be located on the top of the horizontal irrigation pipeline between the discharge side of the irrigation pump and the inlet side of the double check valves. The vacuum relief valve shall have an orifice size of at least 3/4 inch for a 4-inch diameter irrigation pipe. The orifice size shall increase proportionally to an increase in irrigation pipe diameter.
- (4) an automatic low pressure drain shall be located on the bottom of the horizontal irrigation pipeline between the discharge side of the irrigation pump and the inlet side of the double check valves. Such device shall be level and have an orifice size of at least 3/4 inch for a 4-inch diameter irrigation pipe. The orifice size shall increase proportionally to an increase in irrigation pipe diameter. The drain shall not extend beyond the inside surface of the bottom of the irrigation pipeline and shall be at least two inches above grade. The automatic low pressure drain shall discharge at least 20 feet from any water supply. The discharge from the drain shall be controlled to prevent the drainage from reentering the water supply.
- (5) a flow interrupter device shall be located in the pesticide supply line between the pesticide injection unit and the pesticide supply tank or container. A normally closed solenoid-operated valve or other similar device is an acceptable method to positively prevent flow of pesticide or water in either direction during pesticide injection system failure or shutdown.
- (6) a check valve shall be located on the pesticide injection line between the point of pesticide injection into the irrigation system and the pesticide injection unit to prevent the overflow of the pesticide supply tank or container.
- (7) a functional systems interlock shall be provided. If interruption of the irrigation water flow occurs, the interlock must, at a minimum, cause the shutdown of the pesticide injection unit. If the irrigation pump and pesticide injection unit are at different sites, a low pressure cutoff, located near the point of pesticide injection into the irrigation system, could be electrically connected to the pesticide injection unit to provide for its shutdown in the event of low water pressure.

*History Note: Statutory Authority G.S. 143-453; 143-466;
Eff. January 1, 1987.*

.2003 PROHIBITION OF CONNECTION TO A PUBLIC WATER SYSTEM

(a) An irrigation system used for pesticide application shall not be connected directly to a public water system.

(b) The water from a public water system must be discharged into a reservoir tank.

(c) There shall be a complete physical break (air gap) between the outlet end of the fill pipe and the top or overflow rim of the reservoir tank of at least twice the inside diameter of the fill pipe.

*History Note: Statutory Authority G.S. 143-463; 143-466;
Eff. January 1, 1987.*

.2004 INSPECTION: INSTALLATION: MAINTENANCE AND MODIFICATIONS

(a) Antisiphon devices and a functional systems interlock, used for chemigation purposes, shall be installed and maintained to ensure proper function during chemigation.

(b) During periods of chemigation, the system operator shall inspect the antisiphon devices and the functional systems interlock to ensure that they are functioning properly.

(c) If modifications or changes in design, technology, irrigation practices or other similar reasons warrant the use or placement of equipment in lieu of that specified herein, the Pesticide Board may allow for such changes in advance of use, provided protection to the water supply is at least equal to that provided by the equipment, or placement thereof, required in this regulation.

(d) Inspections of an irrigation system utilized for chemigation may be made at any time by a representative of the Pesticide Section, North Carolina Department of Agriculture. Whenever any such equipment is determined not to be in compliance with this Section, the owner or operator shall be issued a stop use order, and the equipment shall not be used for the purpose of applying pesticide(s) until such time as proper repairs and/or alterations are made and the stop use order is released by official notice from the North Carolina Department of Agriculture.

Official Analyses of Pesticides 1987

Definitions of Decisions

A summary of pesticides analyzed and the results of samples determined to be at variance from the guarantee are tabulated in the following pages. For the reader's ready interpretation of the report, those designations used are explained in the following paragraphs.

"PASSED" signifies that the labeling and composition of the product satisfactorily complied with guarantees and requirements.

"DEFICIENT" signifies that one or more ingredients fell significantly below the guarantee. Such products are placed under **"Stop Sale Orders"** and are removed from the market for reprocessing or relabeling. A deficiency penalty is also assessed against the manufacturer.

"EXCESSIVE ACTIVE INGREDIENT" indicates a significant excess of one or more active ingredients. Such formulations could be harmful to the user and/or result in excessive residues.

"ADULTERATED" indicates that quantities of undeclared active ingredients were present above established tolerances. Such lots, batches or brands are stopped from sale and other appropriate action taken.

"MISBRANDED" signifies that labeling failed to conform to requirements. Omission of some item or statement is a more common flaw. Among these may be proper ingredient listing, skull and crossbones, **"Poison"** in red and antidote where these are required; net contents by weight or volume; class of, and unsulfonated residues of petroleum oils; and percentages of alkaloids instead of crude product such as *sabadilla* seed.

In some instances of misbranding, the defect appeared to be inadvertent and of a minor nature. In others, removal from sale is necessary.

"NOT REGISTERED" signifies that the product was not registered at the time it was sampled. Any such product is required to be registered prior to release from **"Stop Sale Order."** A delinquent registration penalty is also assessed against the manufacturer.

As has been the practice in past work, analyses were made largely for those ingredients which were considered of major importance, as, for example, methyl parathion, whereas the related compounds were not checked. For sake of brevity, active ingredients not checked are not listed in Table II. This should not be taken to indicate that manufacturers did not include them on labels. This procedure has been followed because it enables a broader coverage of all products offered for sale.
